ABOUT

MERN Stack Developer with 1+ year of experience building scalable web applications, including e-commerce, CRM, and booking systems. Skilled in developing production-ready systems with secure authentication, payment integration, and performance optimization, focusing on clean architecture and maintainable code.

EXPERIENCE

2024 - PRESENT

Full Stack Developer - Freelance

Delivered scalable web applications for startups and businesses

- Delivered 20+ web applications including e-commerce platforms, CRM systems, and business tools.
- Built scalable full-stack applications using MERN stack (React, Node.js, Express, MongoDB).
- Designed and developed RESTful APIs and handled complete application workflows.
- Implemented secure authentication systems (JWT, sessions) and role-based access control.
- Integrated third-party services including Stripe/PayPal payment gateways.
- Optimized application performance and resolved production issues, improving reliability.

MERN Developer - Bella Findings

A company focused on e-commerce solutions

- Maintained and enhanced a large-scale e-commerce platform.
- Developed and deployed new features while resolving critical bugs.
- Improved performance and optimized backend workflows.
- Built reusable frontend components and contributed to modern UI architecture.

JavaScript Developer - Acre31

Wedding venue booking and management platform

- Built a full-stack wedding venue booking platform with user-facing pages and admin dashboard.
- Developed a date/time slot scheduling system with conflict prevention logic.
- Implemented booking and contact workflows with automated email notifications.
- Integrated REST APIs for bookings, availability, and dashboard analytics.
- Improved system reliability through validation, CORS handling, and production debugging.

EDUCATION

Bachelor's in Computer Science

Bahauddin Zakariya University

Sep 2022 – Sep 2026 (Expected)

Object-Oriented Programming, Data Structures & Algorithms, Web Development, Software Engineering

SKILLS

Core: MERN Stack (React, Node.js, Express, MongoDB)

Frontend: HTML, CSS, Tailwind, Bootstrap

Backend: REST APIs, JWT

Tools: Git, Stripe, PayPal

PROJECTS

MERN E-commerce Platform

<https://talha-mern-shop.netlify.app/>

Full-Stack Multi-Vendor Marketplace

- Built a full-stack MERN multi-vendor marketplace with role-based user, seller, and admin dashboards.
- Designed a vendor-based order system enabling independent fulfillment workflows per seller.
- Integrated Stripe, PayPal, and COD payments with secure backend validation and webhooks.
- Developed real-time chat using Socket.IO with JWT authentication and live messaging events.
- Implemented secure auth with JWT, Google OAuth, OTP recovery, and role-based access control.
- Optimized performance using MongoDB indexing, aggregation, and efficient API design.
- Built scalable REST APIs (100+ endpoints) using layered architecture and modular structure.
